

# K-CUP 85

SELF-HEATING NOODLE CUP

The export workhorse. A double-walled cup with a sealed exothermic heat cell beneath the food tray. Pull the tab, add water, and the meal heats itself - no flame, no socket, no microwave. Built for airlines, ration programs, outdoor retail and convenience channels.

|                  |                                             |
